

# Contents

<b>1. Digital 3D Documentations in Archaeology</b>	<b>1</b>
1.1. Clarification of the Term '3D Reconstruction'	3
1.1.1. Reconstructive 3D Modeling	3
1.1.2. Methods for 3D Reconstruction	4
1.1.3. Archaeology with High Interdisciplinarity	8
1.1.4. Photo-based 3D Reconstructions	9
1.1.5. Camera-Based Systems in Real-Time Robotics	9
1.2. 3D Reconstruction as a Changing Process Chain	10
1.3. Photos and 3D Models Alone are Meaningless	11
1.4. Good Reasons for 3D Reconstructions in Archaeology	11
1.4.1. Making Things Measurable	12
1.4.2. Automatic Identification of Unknown Objects	14
1.4.3. Assistance in Interpretation	14
1.4.4. Presentations and Publications	15
1.4.5. Exhibition in Museum Settings	15
1.4.6. Digitization Enables Parallel Investigations	16
1.4.7. Support in Excavation and Documentation	16
1.5. Possibilities and Limitations of 3D Reconstructions	17
1.5.1. 3D Reconstruction of a Skull	17
1.5.2. 3D Reconstruction of a Human	18
1.5.3. 3D Reconstruction with Smartphone Photos	19
1.5.4. 3D Reconstructions Above and Under Water	19
1.5.5. Limits of Photo and Videogrammetry	21
1.6. Software Packages for 3D Reconstruction Processes	21
1.6.1. Programs for Data Acquisition	21
1.6.2. Preprocessing Software for Video and Image Data	21
1.6.3. Programs for 3D Reconstruction	23
1.6.4. Programs for Monitoring and Post-Processing	23
1.7. Results of 3D Documentation	23
1.8. Summary and Outlook	24
1.9. Comprehension Questions and Exercises	25
1.10. Practical Assignments	25
<b>2. Fundamentals of Digital Photography</b>	<b>27</b>
2.1. Camera Basics	28
2.1.1. Aperture Controls the Amount of Light Entering	28
2.1.2. Focal Length Controls Field of View	29

## Contents

2.1.3.	Focus Controls Depth of Field . . . . .	30
2.1.4.	Depth of Field . . . . .	30
2.1.5.	Sensitivity of the Image Sensor . . . . .	31
2.1.6.	Smartphone, DSLR, and Mirrorless Cameras . . . . .	32
2.2.	German Photography Law . . . . .	32
2.3.	Ideas for Successful Image Composition . . . . .	33
2.3.1.	Centered Composition and Symmetry . . . . .	33
2.3.2.	The Golden Ratio . . . . .	33
2.3.3.	Placement of the Horizon . . . . .	34
2.3.4.	Setting the Focus Area . . . . .	35
2.3.5.	Balance between Foreground and Background . . . . .	37
2.3.6.	Framing of the Image . . . . .	38
2.3.7.	Points and Small Color Accents . . . . .	38
2.3.8.	Rule of Proportion . . . . .	38
2.3.9.	Left-to-Right Rule and Rule of Space . . . . .	38
2.3.10.	Diagonals and Triangles . . . . .	39
2.3.11.	Consider Body Posture . . . . .	39
2.3.12.	Intentional Overlaps . . . . .	39
2.4.	Purpose as Motivation of a Photo . . . . .	40
2.4.1.	Photos in Research Proposal . . . . .	41
2.4.2.	Photos in Work and Documentation Reports . . . . .	42
2.4.3.	Photos in Presentations . . . . .	44
2.4.4.	Photos in Online Media . . . . .	46
2.4.5.	Photos in Publications . . . . .	47
2.5.	Positioning and Lighting of Find Photographs . . . . .	47
2.5.1.	Theory of Three- and Four-Point Lighting . . . . .	48
2.5.2.	Colors and Temperature Perception . . . . .	49
2.5.3.	Hard and Soft Light . . . . .	50
2.5.4.	Automatic White Balance Usage . . . . .	50
2.5.5.	General Considerations for Object Photography . . . . .	51
2.5.6.	Coin Photography with a Flatbed Scanner . . . . .	54
2.5.7.	Recordings with Glass Plates in Daylight . . . . .	55
2.5.8.	Capturing Images in a Light Tent . . . . .	57
2.5.9.	Capturing Images in a Light Tent for 3D Reconstructions . . . . .	58
2.5.10.	Professional studio shots . . . . .	59
2.6.	The Digital Photo Capture . . . . .	59
2.6.1.	Standard Color Spaces in Computer Graphics and Printing . . . . .	60
2.6.2.	Colorimetric Color Spaces . . . . .	60
2.6.3.	Correction of Camera Lens Distortion . . . . .	61
2.7.	Image Enhancement Methods . . . . .	63
2.7.1.	Posterior White Balance . . . . .	64
2.7.2.	Contrast and Image Sharpness Enhancement . . . . .	64
2.8.	Summary and Outlook . . . . .	64
2.9.	Comprehension Questions and Exercises . . . . .	65
2.10.	Practical Assignments . . . . .	66

<b>3. Basics of Photo and Videogrammetry</b>	<b>69</b>
3.1. Selected Aspects of Photo and Videogrammetry . . . . .	69
3.1.1. Understanding the Complexity of the Task . . . . .	70
3.1.2. Image Reduction to Relevant Features . . . . .	72
3.1.3. Feature Extractions from Blob Detection to SIFT . . . . .	74
3.1.4. Model Approximation Using RANSAC . . . . .	78
3.1.5. Process Chain Structure-from-Motion . . . . .	80
3.1.6. Surface Reconstruction of the 3D Point Cloud . . . . .	81
3.1.7. Illumination and Focus of Relevant Image Content . . . . .	82
3.1.8. Key Aspects of Recording Strategies . . . . .	84
3.2. Videogrammetric Measurement Criteria and Algorithms . . . . .	86
3.2.1. The Min-Max Conflict to Be Resolved . . . . .	87
3.2.2. Periodic, Fixed Image Selection . . . . .	89
3.2.3. Image and Correspondence Evaluation Criteria . . . . .	91
3.2.4. Intelligent Image Selection Methods . . . . .	96
3.2.5. Advantages and Disadvantages of Pure Videogrammetry . . . . .	97
3.3. Close-Range Videogrammetry in Practice . . . . .	99
3.3.1. Stone Bowl at Erdene Zuu Monastery (Mongolia) . . . . .	99
3.3.2. Stone with Handprint in Karabalgasun (Mongolia) . . . . .	99
3.3.3. Videogrammetric Challenge in My Son (Vietnam) . . . . .	99
3.4. Archiving Reconstruction Results . . . . .	101
3.5. Summary and Outlook . . . . .	103
3.6. Comprehension Questions and Exercises . . . . .	103
3.7. Practical Assignments . . . . .	103
<b>4. Introduction to Handling Multicopters</b>	<b>105</b>
4.1. Safe Handling of Multicopters . . . . .	105
4.1.1. Rules for Handling Multicopters . . . . .	107
4.1.2. Operation and Control of a Multicopter . . . . .	107
4.1.3. Communication between Pilot and Multicopter . . . . .	110
4.1.4. Necessity of Compass Calibration . . . . .	111
4.1.5. Home Point, Go-Home, and Automatic Landing . . . . .	111
4.1.6. Behavior in Low Voltage Situations . . . . .	113
4.2. Professional Documentation with Multicopters . . . . .	114
4.2.1. Structure, Sensors, and Battery Indicator . . . . .	114
4.2.2. Controller and Display Information . . . . .	115
4.3. Care and Storage of Batteries . . . . .	115
4.3.1. Charging a Battery . . . . .	116
4.3.2. Transporting a Battery . . . . .	117
4.3.3. Storage of Batteries over an Extended Period of Time . . . . .	117
4.3.4. Logging Battery Usage and Charging Cycles . . . . .	117
4.3.5. Disposal of Batteries . . . . .	117
4.4. Registration Requirement, Competency Certificate, and Insurance . . . . .	117
4.4.1. Air Law in Europe . . . . .	118
4.4.2. Categories and Subcategories for Unmanned Aircraft . . . . .	118

## Contents

4.4.3. Insurance Requirement for Multicopters . . . . .	119
4.5. Summary and Outlook . . . . .	119
4.6. Comprehension Questions and Exercises . . . . .	119
4.7. Practical Assignments . . . . .	120
<b>5. Recording Strategies for Aerial Survey Campaigns</b>	<b>123</b>
5.1. Flight Preparation, Safety Measures, and Team Briefing . . . . .	123
5.1.1. Preparing Multicopter and Camera . . . . .	125
5.1.2. Securing and Preparing the Documentation Site . . . . .	126
5.1.3. Team Meeting and Task Allocation . . . . .	126
5.2. Manual Recording Strategies Ideally . . . . .	127
5.2.1. Orthogonal versus Oriented Recording Flights . . . . .	127
5.2.2. Orthogonal Grid Flight and Orthogonal Double Grid Flight . . . . .	128
5.2.3. Oriented Grid Flight and Oriented Double Grid Flight . . . . .	129
5.2.4. Comparison of Capture Effort and Computational Complexity . . . . .	131
5.2.5. Circle Flight and Helix Flight . . . . .	132
5.2.6. Calibration Flight for Camera Parameter Estimation . . . . .	132
5.3. Manual Recording Strategies in Reality . . . . .	134
5.4. Checklists, Protocols, and Post-flight Procedures . . . . .	135
5.4.1. Protocol for Flight Recordings . . . . .	135
5.4.2. Post-processing Phase Immediately after an Aerial Survey . . . . .	137
5.4.3. Post-processing Phase of a Documentation Day . . . . .	138
5.5. Conducting Team Exercise Scenarios . . . . .	138
5.6. Summary and Outlook . . . . .	138
5.7. Comprehension Questions and Exercises . . . . .	139
5.8. Practical Assignments . . . . .	139
<b>6. Planning and Conducting Automated Aerial Surveys</b>	<b>141</b>
6.1. Selection Criteria for Software Evaluation . . . . .	142
6.2. Easy Introduction with PrecisionFlight . . . . .	142
6.3. Conduct Test Flights and Gain Practical Experience . . . . .	143
6.4. Install Pix4DCapture and Create a Project . . . . .	143
6.5. Planning via Google Earth . . . . .	144
6.6. Select Recording Strategies . . . . .	145
6.6.1. Orthogonal Grid Flight in Orkhon Valley (Mongolia) . . . . .	145
6.6.2. Oriented Double Grid Flight in Karabalgasun (Mongolia) . . . . .	145
6.6.3. Automated Flying in Wind and Mountainous Terrain . . . . .	147
6.7. Choosing and Positioning the Grid . . . . .	148
6.8. Adjusting Flight and Capture Parameters . . . . .	148
6.9. Aerial Campaign with Multi-Missions . . . . .	149
6.10. Workflow for Automated Flight Campaigns . . . . .	149
6.11. Fixed-Wing UAV as Alternative Aircraft . . . . .	149
6.12. Summary and Outlook . . . . .	151
6.13. Comprehension Questions and Exercises . . . . .	152
6.14. Practical Assignments . . . . .	152

<b>7. Georeferencing and Scaling of 3D Models</b>	<b>153</b>
7.1. Geodesy and Reference Systems	154
7.1.1. Geographic and Projected Coordinate Reference Systems	155
7.1.2. Geographic Coordinate Reference System WGS84	155
7.1.3. Projected Coordinate Reference System UTM	157
7.1.4. Projected Coordinate System Gauss-Krüger	158
7.1.5. Coordinate Transformation	159
7.2. Georeferencing Strategies	160
7.2.1. Georeferencing Methods Using Photographs	160
7.2.2. Higher Precision through RTK Systems	161
7.2.3. Georeferencing Methods with Survey Points	163
7.2.4. Georeferencing Methods with Natural Markers	164
7.3. Scaling Example: Sacrificial Stone (Mexico)	164
7.4. Georeferencing Example Steppe (Mongolia)	165
7.4.1. Systematic Flight Planning	166
7.4.2. Processing in DroneDeploy	167
7.4.3. Extension of Existing LiDAR Data with Photogrammetry	167
7.4.4. Ensuring the Percentage of Image Overlap	167
7.5. Georeferencing Example "Schloss der Vögte" (Plauen)	167
7.5.1. Control Points and Sketch	167
7.5.2. 3D Reconstruction and Import of GCP Data	168
7.5.3. Identification and Management of GCP Data	168
7.5.4. Measuring in the 3D Model	169
7.6. Measurements in the Orthophoto and in the 3D Model	169
7.6.1. OpenDroneMap and WebODM	170
7.6.2. Prepare Data and Define Workflow	170
7.6.3. Measurements in the Orthophoto	171
7.6.4. Measurements in the 3D Model	172
7.7. Summary and Outlook	172
7.8. Comprehension Questions and Exercises	172
7.9. Practical Assignments	173
<b>8. Documentation Campaigns with Mini-Submarines</b>	<b>175</b>
8.1. Requirements for Underwater Imaging Systems	176
8.1.1. Freshwater and Saltwater Documentations	177
8.1.2. Accessibility of the Dive Area	177
8.1.3. Fine-tuning of the Diving System for the Task	177
8.2. Localization Strategies under Water	178
8.3. Safe Handling of Mini-submarines	178
8.4. Maintenance and Durability of Components	179
8.5. Checklists and Protocols	179
8.6. Cable-based, Commercial Mini-submarines	179
8.6.1. The lightweight OpenROV	182
8.6.2. The Stable and Powerful BlueROV	184
8.6.3. Cable Modifications and Necessary Cable Management	184

## Contents

8.7. Recording Strategies in Theory and Practice . . . . .	184
8.8. Extension with Cameras and Diving Lamps . . . . .	185
8.9. Development of a Radio Buoy for Longer Distances . . . . .	185
8.9.1. Development Stages towards a Semi-autonomous System . . . . .	186
8.9.2. Overall Concept and Modifications to the BlueROV . . . . .	187
8.9.3. Design and Operation of the Radio Buoy . . . . .	187
8.9.4. Flagging the Buoy . . . . .	187
8.9.5. Improving Positioning . . . . .	189
8.9.6. Adding a Sonar to the Radio Buoy . . . . .	191
8.10. Summary and Outlook . . . . .	191
8.11. Comprehension Questions and Exercises . . . . .	192
8.12. Practical Assignments . . . . .	192
<b>9. Automatic Image Enhancement of Underwater Images . . . . .</b>	<b>195</b>
9.1. Potential of Automatic Color Adjustments . . . . .	196
9.2. Influences of Absorption, Scattering and Caustics . . . . .	196
9.3. Automatic Color Correction with a Color Chart . . . . .	198
9.4. Automatic Color Correction without Color Chart . . . . .	199
9.5. Automated Image Enhancement with JEnhancer . . . . .	199
9.5.1. Basic Idea behind JEnhancer . . . . .	199
9.5.2. Estimating the Water Color . . . . .	200
9.5.3. Correcting the Image Color Using Water Color . . . . .	202
9.5.4. Useful Side Effect of Color Space Correction . . . . .	204
9.5.5. Result of the Color Space Correction . . . . .	204
9.5.6. Important Conditions for the Use of JEnhancer . . . . .	204
9.6. JEnhancer Download and Application . . . . .	206
9.7. Data Packages and Benchmark Tests . . . . .	207
9.8. Summary and Outlook . . . . .	207
9.9. Comprehension Questions and Exercises . . . . .	207
9.10. Practical Assignments . . . . .	208
<b>10. Videogrammetry in Practice . . . . .</b>	<b>209</b>
10.1. Huastecian Temple Complex in Tamtoc (Mexico) . . . . .	209
10.1.1. Hardware Setup as a Challenge . . . . .	210
10.1.2. Example of Reconstruction . . . . .	211
10.2. Extreme Conditions in Kerlingarfjöll (Iceland) . . . . .	212
10.2.1. Wind Conditions as a Challenge . . . . .	212
10.2.2. Example of Reconstruction . . . . .	213
10.3. Excavation Monitoring at Dresden Neumarkt (Dresden) . . . . .	214
10.4. Recording Objects in the Berlin Natural History Museum . . . . .	215
10.4.1. Excursion into the Field of Paleontology . . . . .	215
10.4.2. Example of Reconstruction . . . . .	216
10.5. Tombs of the Kings of Nea Paphos (Cyprus) . . . . .	218
10.6. Images of Plaster Casts of the Toro Farnese . . . . .	219
10.6.1. Manual Recording Strategies for Exposed Structures . . . . .	220
10.6.2. Recording Conditions for Low-structure Surfaces . . . . .	220

10.7. Summary and Outlook . . . . .	220
10.8. Comprehension Questions and Exercises . . . . .	221
10.9. Practical Assignments . . . . .	221
<b>11. The Combination of Photogrammetry and Videogrammetry</b>	<b>225</b>
11.1. Merging Models Subsequently . . . . .	225
11.2. Documentation Campaign in Bukhara (Uzbekistan) . . . . .	226
11.2.1. Aerial and Ground Surveys of the Degaron Mosque . . . . .	227
11.2.2. Selecting a Candidate List for Manual Control Points . . . . .	228
11.2.3. Systematically Working Through the List of Candidates . . . . .	228
11.2.4. Merging the Models of the Degaron Mosque . . . . .	229
11.2.5. Merging Models in Annaberg-Buchholz . . . . .	230
11.3. Combining Ground and Aerial Photography Successfully . . . . .	231
11.4. Documentation Campaign in Karakorum (Mongolia) . . . . .	231
11.4.1. Automated Photogrammetric Flights . . . . .	231
11.4.2. Manual Videogrammetric Aerial Survey . . . . .	231
11.4.3. Successful Combination of Photo and Video Data . . . . .	232
11.4.4. Example of Reconstruction . . . . .	232
11.5. Summary and Outlook . . . . .	232
11.6. Comprehension Questions and Exercises . . . . .	233
11.7. Practical Assignments . . . . .	234
<b>12. Planning and Execution of Documentation Campaigns with Multicopters</b>	<b>235</b>
12.1. Workflow of a Documentation Campaign . . . . .	235
12.1.1. Topographic Complexity of Documentation Sites . . . . .	237
12.1.2. Rough Cost Estimation through Automated Flight Planning . . . . .	238
12.1.3. Preview, Classification and Characteristics . . . . .	238
12.1.4. Quick Technical Preview . . . . .	241
12.1.5. Logistics, Documents and Licenses . . . . .	241
12.1.6. Detailed Cost Estimation . . . . .	243
12.2. Extension and Adaptation of the Workflow . . . . .	243
12.2.1. Fusion of LiDAR and Photogrammetry Data . . . . .	244
12.2.2. Recording Strategy and Preparations . . . . .	245
12.2.3. Battery Management for Large Projects . . . . .	246
12.3. Summary and Outlook . . . . .	246
12.4. Comprehension Questions and Exercises . . . . .	246
12.5. Practical Assignments . . . . .	247
<b>Epilogue</b>	<b>247</b>
<b>A. Framework for Exercise Scenarios</b>	<b>251</b>
<b>B. Training Scenarios for Beginners</b>	<b>253</b>
<b>C. Regular Training Scenarios for Pilots</b>	<b>255</b>
